

ASSEMBLY REPORT

IV-B

*Your mind is a garden, your thoughts are seeds
You can either grow flowers or weeds.*

From the discovery of fire by striking stones to invention of bulb to generate light, the world has come a long way. It is because of some of the significant inventions that life has become easy for each one of us. Thus, the day's assembly was dedicated to spread knowledge about a few inventions and their inventors through a presentation by the students of class IV-B.

The day began with shabad to seek the blessings of the almighty. This was followed by news headlines, thought for the day and addition of two new words for the purpose of enhancing the vocabulary of students.

Next in line was a presentation of students titled "INVENTIONS AND INVENTORS" which was a role play where students enacted the inventors-Thomas Adison, Graham Bell, J.L Baird and Galileo. The students talked about these famous inventors' contributions to the world and history. The presentation was followed by a short creative song sung by students to elaborate upon the concept of inventions. The assembly was not only fun-filled but was also full of knowledge for all students. The assembly concluded with Principal Mrs. Asha Saran Srivastava congratulating and complimenting the performers for their great efforts.
