

ASSEMBLY REPORT
VII-B
NATIONAL ENERGY CONSERVATION DAY
13.12.2022

“Earth provides enough to satisfy every man's needs, but not every man's greed.”
— Mahatma Gandhi

National Energy Conservation Day is a medium and an approach towards creating a strategic mindset for preserving energy and resources for future generations. National Energy Conservation Day is observed each year on the 14th of December to create awareness about the importance of resources and preserve them. Keeping this in mind an informative assembly was conducted by class VII B on 13th of December 2022 in which students learned about the importance of resources and how to preserve them for our future generation. Each individual can spare vitally by wiping out the pointless utilization of electrical equipment that is utilized in everyday life.

The assembly began with the ‘Shabad’ followed by the thought for the day and the news headlines. Students put forth their opinion on need of energy conservation. A street play was performed by students to depict the need of energy conservation. The assembly ended with a pledge on saving energy by all the students. Overall, it was an informative assembly.
