

Report on Visit to the National Science Centre

The students of Jaspal Kaur Public School embarked on an educational field trip to the Nehru Science Centre on 30 September 2023. The visit aimed to provide the students with an immersive and interactive learning experience in the field of Science and Technology.

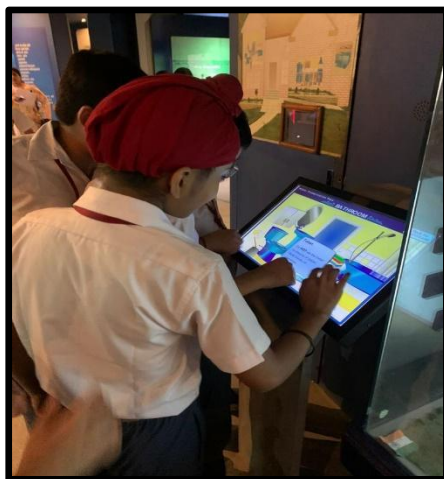

It was an enriching experience. It not only complemented their classroom learning but also ignited a passion for science and technology. The trip provided a memorable opportunity for the students to connect with the wonders of the scientific world, fostering a lifelong love for learning and exploration.

The visit to the Nehru Science Centre was a resounding success in terms of achieving its educational objectives. The visit improved students' understanding of scientific principles and concepts, enhanced appreciation for the importance of science in our daily lives, and increased curiosity and interest in scientific inquiry.

The students and teachers had an eventful day with various activities and experiences. The place boasts a wide array of interactive exhibits, allowing students to explore and experiment with different scientific principles. Students had the opportunity to learn about Physics, Biology, Astronomy, and much more. Notable exhibits included a giant pendulum, a Foucault's pendulum, and a mirror maze.

The visit included a trip to the planetarium, where students were transported to outer space through stunning visuals and informative presentations. They learned about the solar system, constellations, and the universe's wonders. The students had the opportunity for Hands-on learning. It was a memorable learning experience and the students looked forward to more such experiences.
