The participants were interactive and resourceful. We all participated in full spirit and learnt the concept of Active Learning by actively participating in all the activities. Activities were relevant to the topics covered. Activities aligned with the workshop's objective, and they were pertinent to the participant's needs. Lecture was clear and understandable as that involved variety and practicality. The resource persons too were expert in their topic, approachable and with great communication skills. All necessary handouts were printed one day before and were distributed to all participants during the workshop.

There were 4 sessions in total and of 90 minutes each excluding 30 minutes of lunch break at 1:30 pm.

Learning Outcomes:

Participants were now aware of Active Learning and the limitations of Passive Learning. Learning by doing will always make a long-lasting effect in the minds of students. In class, students practice skills, solve problems, struggle with complex questions, make decisions, propose solutions and explain ideas in their own words through writing and discussion. To sum up, Active Learning leads students towards success. Active Learning promotes lifelong learners. Active Learning stands for a lifetime of engagement.
