## **Career Talk Session on ‘Stream Selection and Career Options’ for Class XI**

The career talk session held on 22nd April 2025, conducted by Mr. Vaibhav Sharma at Jaspal Kaur Public School for Class XI students, served as an illuminating and empowering platform that expertly guided young minds through the critical juncture of stream selection and future career pathways. As a seasoned life coach and personality trainer with over a decade of rich experience in the educational and corporate world, Mr. Sharma brought with him a wealth of knowledge and practical insights. His impressive background—having consulted with renowned organisations across diverse sectors—lent significant credibility and relevance to his address.

The session’s interactive and engaging nature fostered an environment of open inquiry and thoughtful reflection. Mr. Sharma adeptly navigated the complex landscape of emerging career options, ensuring that students were not only informed about conventional paths but also introduced to the exciting possibilities presented by evolving industries and technologies. By emphasising the importance of self-discovery, he encouraged students to look inward—identifying and exploring their unique strengths, interests, and personality traits as foundational pillars for making informed career decisions.

This emphasis on self-awareness is particularly crucial for Class XI students, who stand at a pivotal stage in shaping their academic and professional journeys. Understanding one’s aptitudes and passions significantly increases the likelihood of selecting a stream and career that fosters both success and fulfilment. Mr. Sharma likely shared effective strategies for introspection—prompting students to reflect on subjects they genuinely enjoy, activities that energise them, and areas where they naturally excel.

Furthermore, the session underscored the importance of aligning academic choices with long-term career aspirations. By shedding light on emerging fields such as data science and analytics, artificial intelligence and machine learning, cybersecurity, biotechnology, and renewable energy, Mr. Sharma broadened students’ horizons beyond traditional options like medicine and engineering. He likely detailed the skills, educational pathways, and opportunities associated with these fast-growing sectors, empowering students to make well-informed decisions when choosing between the Science, Commerce, or Humanities streams.

The value of such a career guidance session cannot be overstated. It equips students with essential tools and perspectives to navigate the often-daunting process of career planning. Armed with an understanding of diverse opportunities and grounded in self-awareness, Class XI students can move forward in their academic journeys with enhanced clarity, confidence, and purpose—paving the way for a fulfilling and successful professional life. Mr. Vaibhav Sharma’s expertise and engaging delivery undoubtedly left a lasting and positive impact on the young attendees of Jaspal Kaur Public School.
