

# EARTH DAY CELEBRATION

*'Save Earth from plastic birth.'*

April 22, celebrated as Earth Day, was initiated to inspire everyone to rejoice and cherish our beautiful planet, as well as to awaken people to their role in saving Earth. This year, the theme for Earth Day was "Planet Vs Plastic." Therefore, the students of Jaspal Kaur Public School, Shalimar Bagh, took the initiative to raise awareness about the growing plastic menace and its harmful effects on Mother Earth.

A special assembly was conducted by the students of classes V and XI to share the history, importance, and various measures that can be adopted to address the challenges faced by our Earth. An energetic nukkad natak was performed by the students of class V to emphasize the importance of following the 3 R's of waste management. To sensitize the children to become crusaders for environmental conservation and the need to save and preserve the environment, the various clubs of JKPS organized an array of activities for the students, including waste-to-wonder projects, awareness campaigns, strategies to eliminate the use of Single-Use Plastic, pamphlet designing, poster making, and, most importantly, a plantation drive carried out in the school premises by both students and parents to make our surroundings greener.

"A little effort will go a long way on everyone's part" should be the guiding principle for each of us to save, preserve, worship, and care for our planet, Earth.
