

## Report on Event- Eco Rockstars

*"Recycling things is like magic that turns ordinary things into extraordinary."*

The Eco Club of JKPS continually strives to instill the habit of reusing and recycling among students. This year, the Eco Club organized an interactive and engaging Parent-Child activity titled 'THE ECO ROCKSTARS' on May 21, 2024. During this activity, students and their parents collaboratively created beautiful and imaginative items entirely from waste materials such as grains, old wedding cards, bottles, and newspapers. This fun-filled event helped participants collectively learn how to make the best use of waste and, in turn, contribute to preserving the environment.

The members of the Art Department evaluated the articles created by students and parents based on four criteria: creativity and innovation, materials used, aesthetic appeal, and overall presentation. The top three presentations were announced and honored by our respected Principal Ma'am and Headmistress Ma'am.
