

Report on Parenting Session for Class 1 Student's Parents

A dedicated parenting workshop was arranged for the parents of Class 1 students coinciding with the school's project show on February 17, 2024, led by the school counselor, Ms. Sheetal Dewan in the school auditorium. The session's objective was to offer valuable insights and counsel on diverse facets of parenting, encompassing parenting styles and emphasizing the significance of fostering familial bonds.

The parenting session provided a platform for parents to understand the dynamics of different parenting styles and to recognize the importance of connection with the family. The session equipped parents with practical tools to enhance their parenting skills by facilitating discussions on positive discipline and emotional well-being. The positive feedback from the parents emphasized the value of such sessions in promoting healthy family dynamics and fostering the overall development of their children.

The session enabled parents to reflect on their current parenting styles and encouraged them to adapt more effective approaches suitable for their children's well-being. The knowledge gained empowered parents to make informed decisions and implement positive changes in their interactions with their children.
