## SWACHHATA PAKHWADA 2024

In recognition of the crucial role that schools play in spreading awareness about the Swachhata Mission and its implementation across the country, Jaspal Kaur Public School (JKPS) organized a series of activities from 1st September to 15th September 2024, in accordance with the Action Plan outlined by the Directorate of Education (DoE). This initiative is aimed at fostering cleanliness and hygiene within the school and the wider community, promoting a healthier and more sustainable environment for all.

The Swachhata Pakhwada commenced with both students and teachers taking a pledge to uphold the importance of personal and social hygiene. This symbolic act of commitment set the tone for the entire campaign. Students participated enthusiastically in creating informative and visually appealing posters, banners, slogans, and drawings, all designed to raise awareness about the significance of cleanliness and water conservation.

The campaign also focused on educating students about the importance of personal hygiene. Workshops and demonstrations emphasized key practices such as regular hand washing, the use of sanitizers, wearing masks, and maintaining general cleanliness, including regular nail trimming. This was particularly relevant in the context of the ongoing health concerns globally, reinforcing the significance of hygiene in preventing the spread of diseases.

Additionally, the Swachhata Pakhwada extended beyond the school premises, as students, with the involvement of their parents, took the initiative to clean their surroundings at home. This aspect of the campaign ensured that the message of cleanliness reached the community, encouraging collective responsibility and active participation in maintaining a clean environment.

The Swachhata Pakhwada was successfully observed at JKPS, allowing the school to not only promote cleanliness within its boundaries but also take this important mission into the larger community, thereby creating widespread awareness and fostering a culture of hygiene and sanitation.
