

## Visit to Living Treasure Dispensary, Nehru Vihar

*“We make a living by what we get, but we make a life by what we give.”*

**-Winston Churchill**

On 21 August 2024, a significant visit was made to the "Living Treasure Dispensary", as part of our ongoing **Community Outreach Programme**. This initiative reflects our continued commitment to serving the community and fostering a sense of social responsibility among our students.

The visit was led by **Ms. Pallavi** and included the active participation of four Class VIII students and a dedicated parent. Their involvement was crucial in ensuring the success of this initiative, as they represented our school with compassion and a strong sense of duty.

During the visit, JKPS contributed essential medicines to the dispensary. These contributions were received with heartfelt appreciation, underscoring the positive impact of our efforts. The medicines will play a vital role in supporting the health and well-being of those in need.

This initiative aligns with several Sustainable Development Goals (SDGs), particularly:

**SDG 3: Good Health and Well-Being:** By giving out essential medicines, we are directly contributing to the health and well-being of individuals who rely on the dispensary for their medical needs.

**SDG 17: Partnerships for the Goals:** The collaboration between our school, the dispensary, and the participating parents exemplifies the power of

partnerships in achieving sustainable development. Together, we aim to make meaningful difference in the lives of those in need.

This initiative also provided our students with a valuable opportunity to engage directly with the members. Our community outreach volunteers played an indispensable role in the success of this initiative. Their dedication, coordination, and active participation ensured that the visit is carried out smoothly and effectively. The volunteers not only manage the logistics but also serve as role models for

our students, demonstrating the importance of community service in action.

The visit to the Living Treasure Dispensary was a resounding success, made possible by the dedication of our volunteers, the enthusiasm of our students, and the support of our community. This initiative not only provided much-needed medical support to the dispensary but also reinforced the values of empathy and social responsibility among our students.
