Report on Psychometric Assessment for Classes X-XII

“The future belongs to those who know themselves well enough to make informed choices.”

As part of the first phase of the school’s **Annual Career Fair – Career Care 4.0**, a psychometric assessment was conducted for students of **Classes X, XI, and XII** in collaboration with the **Mindler team**. The assessments were held on the school premises on **12th September 2025 for Class X, 15th September 2025 for Class XI, and 22nd September 2025 for Class XII**.

This initiative aimed to help students explore their individual strengths, interests, and aptitudes, enabling them to make informed academic and career decisions. The Mindler team guided students through the assessment process, helping them interpret their results and understand the diverse career pathways aligned with their profiles. The sessions were interactive and engaging, allowing students to reflect on their personal attributes, skills, and long-term aspirations.

The **psychometric phase of Career Care 4.0** proved to be a fruitful and insightful experience for the learners. It not only fostered **self-awareness** and **confidence** but also encouraged students to take ownership of their educational and career journeys. This initiative reinforced the school’s commitment to providing holistic career guidance and preparing every learner for the future.
