Workshop Report: Understanding Artificial Intelligence as a Resource for Teachers

A faculty workshop titled "Understanding Artificial Intelligence as a Resource for Teachers" was conducted on May 22, 2025, in the Senior Computer Lab. The session aimed to introduce teachers to the growing role of artificial intelligence in education and to demonstrate how AI tools can support and enhance teaching practices.

Led by Ms. Prabhjot Kaur Bedi and Ms. Prabhjot Gulati, the workshop provided an overview of practical AI tools such as **ChatGPT, Canva AI, Quizizz, Bright class, lexica.art and MagicSchool.ai**. The resource persons explained how these tools can be used effectively for **lesson planning, content creation, formative assessments, and increasing student engagement**.

Teachers engaged in hands-on activities and explored the functionality of these platforms in real-time. The interactive nature of the workshop helped teachers understand the practical applications of AI in their daily teaching workflows.

The session received positive feedback from participants, who found the content **informative, relevant, and applicable** to their teaching contexts.
