

Paper bag making

Vivekananda Pathshala held on 1st October 2019 was really a great experience not only for the students but for the teachers as well.

It was a skill development activity in which students learnt to make paper bags out of Origami sheets.

A demonstrative video was shown to the students to guide them.

Students made colourful bags and they loved and enjoyed the activity.

It was also an attempt to promote discourage the use of Plastic bags.

They promised they would use handmade paper bags in future.
